Profile

As a Bachelor of Computer Science graduate, I am eager to apply my passion for coding and software development to a professional environment. I have spent several years honing my skills and working on various projects to prepare for a career in the tech industry. I recently have completed two projects that showcase my abilities as a developer. Overall, I am confident in my ability to learn quickly, adapt to new technologies, and collaborate effectively with others.

Project 1

<https://zzhou0922.github.io/smart-brain/>

This project was a website that I developed from scratch, covering the front-end, back-end, and database. This project challenged me to develop my skills in HTML, CSS, JavaScript, Node.js, and PostgreSQL, and to learn how to integrate these technologies to create a functional and responsive website.

Project 2

<https://zzhou0922.github.io/sorting-visualizer/>

The project was a sorting visualizer which providing animation of 5 different sorting algorithms. It's a React-based project. It allowed me to showcase my understanding of fundamental computer science concepts.

Skills

Java

JavaScript

Python

Education

Dec, 2022 - Mar, 2023

Master the Coding Interview: Data Structures + Algorithms

Udemy

Oct, 2022 - Dec, 2022

The Complete Web Developer in 2023: Zero to Mastery

Udemy

Spring, 2017 - Summer, 2019

Bachelor of Science in Computer Science

University of Washington

Work Experience

July, 2018 - March, 2023

Restaurant Manager and Co-owner

Pacific Cafe

I co-owned and operated a restaurant, collaborating with partners to make key business decisions, divide responsibilities, and navigate conflicts effectively. As the manager, I focused on daily operations, leading a team of employees, delegating tasks, and providing feedback on performance, resulting in increased productivity and positive customer experiences. Through daily interactions with customers, employees, and partners, I developed strong communication and problem-solving skills, including active listening, conflict resolution, and persuasive communication. My experience is valuable and transferable to the software development industry that I am passionate about.
